

HEAVY BUD™ PRO

RIPENING AGENT

TECHNICAL INFO

Application rate:

 2ml per 1L

Derived from:

 Potassium hydroxide, Fermented Molasses, Boric Acid.

Nutrient (ppm) at 1 ml/L:

Nitrogen (N) 10 ppm Boron (B) 1 ppm
Soluble Potash (K₂O) 30 ppm

| Nothing Synthetic | All from Naturally Occuring ingredients |

KEY FEATURES

Improves harvest quality

Provides plant energy, increases nutrient availability and stimulates soil biology

Contains amino acids that accelerate plant production

THE SWEET SMELL OF SUCCESS

While every grower works for a higher yield, it's outstanding flavour and aroma that makes a great grower stand out. Heavy Bud™ Pro builds quality in high yielding crops. A fusion of ingredients to increase metabolism, sugar content, essential oils and key metabolites. The result is enhanced flavour, aroma and shelf life. Heavy Bud™ Pro is a catalyst meant for use during the mid to late stages of floral development when plants focus on flower density and fruit quality.
