

# RollCraft

Powered by STM

# RollCraft MRB

72 or 143 PRE-ROLLS PACKED IN 90 SECONDS

The RollCraft MRB delivers STM's proven pre-roll consistency in a compact, accessible system designed for startups and craft operators. Powered by a 44 ft-lb centrifugal filling system and universal 72-count tray compatibility, it produces evenly packed pre-rolls across all major cone sizes without the need for pre-weighing.

Lightweight and workstation-friendly, the RollCraft MRB incorporates STM's patented technologies to provide a reliable, entry-level solution for automated pre-roll production, making it an ideal first step toward scalable, professional manufacturing.

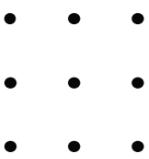

## **INCLUDES:**

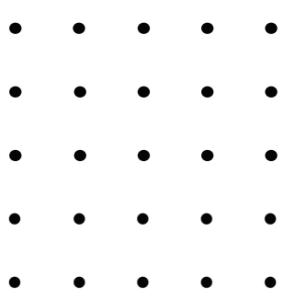

**MINI TOP TRAY**

**MINI BOTTOM TRAY**

**MINI LOADING BOX**

\* Results will differ depending on the material, equipment, personnel, facility, controls and the specific processes employed. STM is dedicated to helping you attain optimal results through our equipment and processes.

# RollCraft MRB

The RollCraft MRB maximizes production efficiency by eliminating common pre-roll bottlenecks through fast, reliable, and consistent output in a compact footprint. By significantly reducing labor requirements, it enables operators to produce higher volumes in less time, lowering operating costs while increasing overall throughput. This efficiency makes scaling simple and predictable, allowing businesses to grow output without adding headcount and creating a clear, cost-effective path to long-term expansion.

### Key Features:

- Compact, light-duty chassis optimized for small-to-mid operations.
- 44 ft-lb centrifugal system
- Supports all common cone sizes (standard cones, slim cones, etc.)
- Consistent fill: even, repeatable packing without pre-weighing required.
- Modular and scalable: ideal as an entry-level machine or secondary line.
- Lightweight with separate control module

## ROLLCRAFT'S MRB

I Fast, Consistent Output - Reliable high-speed performance.

I Easy Maintenance - Minimal cleanup and hassle-free upkeep.

★IMPROVE QUALITY

★REDUCE LABOR

★ INCREASE PROFITS

The RollCraft MRB cuts labor costs with faster, efficient production and delivers a quick, cost-saving ROI.

Load Cones

# RollCraft's MRB & ATC Bundle

The RollCraft MRB and ATC combo package provides a streamlined pre-roll production workflow from filling to final closure. The MRB automates accurate pre-roll filling and packing, reducing weight variability, material waste, and manual labor while increasing throughput. The ATC completes the process with consistent Dutch crown closures, eliminating slow hand twisting and uneven finishes. Together, this combo solves common production bottlenecks, lowers cost per pre-roll, and delivers a uniform, retail-ready product that supports scalable growth.

## Key Features:

- Fills in 60-90 seconds, Closes 72 pre-rolls per cycle in under 90 seconds
- Lightweight, compact design for easy setup, movement, and small workspaces
- Craft-focused construction suitable for low- to mid-volume production
- Simple analog controls that require minimal training
- Accessible components for quick cleaning and routine maintenance
- Bundle comes with extra trays and accessories
